BUILT TO GO

NEW 1966 175cc CAMPERA

THE CITY BIKE THAT'S AT HOME IN THE WOODS!

Campera—a lot of riding fun at a low price. You get a 175cc machine with racy lines colored candy-red, silver, polished aluminum, and chrome. This motorcycle glistens!

On the street, the Campera cruises effortlessly at 65 mph with plenty of reserve for passing. It carries you and your passenger in comfort on a huge saddle. It handles as if it were born for the highway, like all Bultacos. But the fun really begins when you leave the pavement and head out across country. The detuned engine is crammed full of low-end torque for pulling power. The centerfloat Zenith carb gives you precise low-speed throttle control.

Gearbox ratios make a big difference in the boonies. The Campera's wide-ratio gearbox has the right speed-power combinations; clutch it, wiggle your right foot, and go!

The bike is rugged—built to take it. You get a skid-plate with nine inches of empty space beneath it, to get you over things (like logs) safely. Both sets of footpegs are the folding kind, and the front set is springloaded.

You can enjoy the Campera most anyplace. It gives you a lot of adventure at a reasonable price. The list: \$585, fob Sch'y (West, slightly higher). See your Bultaco dealer, or write tomorrow for Brochure 21-C.
